Lightworks, price on request <http://treluce.com>

Great if you're looking for a talking point in the room. Perspex, a reflective material, creates the illusion of a whole object when in fact only half exists
THO MIN CHONG, ASST. ART DIRECTOR

Stack, from £1500, www.establishedandsons.com

Challenging the common definition of what a drawer unit should be, Stack by Shay Alkalay can be pushed and pulled in two different directions to create charmingly random forms that are both functional and fascinating to look at

Moon, \$11,880, Mod.Living

Screens are the perfect way of dividing the space in a room, plus there's an old-time glamour about it that calls to mind the retro screen-goddesses of yesteryear. Moon by Carlo Ballabio for Emmemobili has a great aesthetic that's modern and delicately complex at the same time!
